THE CHARLEROI MAIL

VOL. XX—NO 50. CHARLEROI, WASHINGTON COUNTY, PENNSYLVANIA, SATURDAY, AUGUST 2, 1919. TWO CENTS

SEVERAL MEETINGS HELD TO PROMOTE NEW HOSPITAL PROJECT

Districts Organized and Details Are Being Rapidly Completed

MEET WITH MINERS NEXT WEEK

The local hospital campaign is acquiring greater momentum from day to day and when the real work of solicitation begins on the 11th inst. it is expected that every detail will have been taken care of, so that the various committees can go right ahead with their work without having to spend time explaining the proposition.

Friday afternoon a meeting of the Industrial division was held at the office of the Pittsburgh Steel Products company in Monessen, at which time the work was divided into four sections, which will greatly simplify matters.

The first section will comprise the Pittsburgh Steel and the Pittsburgh Steel Products mills, with Mr. Hennigan as captain.

The second section will comprise the Page Steel and Wire company, the foundry, the tin mill and the Carnegie Steel company, captain to be selected.

The third division will take in the industries of Charleroi, Bentleyville, and Ellsworth, with Mr. Heupel as captain.

The fourth division will include the industries of Belle Vernon, Allenport, Roscoe and other communities in that locality, with T. C. McKnley as captain.

The industrial section has adopted the slogan, "At least a Dollar a Pay for twelve pays."

A meeting was also held in the Presbyterian church at Belle Vernon last night, which was well attended. John D. Berryman was present and made the address of the evening, after which Dr Crosby was elected Chairman and F. W. Attleberger Secretary for the Belle Vernon district.

A meeting was also held at the office of the Steel Products mill at Allenuport last evening ,with a fine attendance of those interested in the project. Representatives were present from Allenport, Stockdale, Roscoe, Elco and Long Branch. John Stephens, cashier of the First National Bank of Roscoe was elected Chairman, with the following gentlemen elected as head of the local districts:

Allenport—Dr. Haines.
Roscoe—Charles Langford.
Stockdale—William Bryden.
Elco—Henry Stephenson.
Long Branch—James Herron.

To further interest the miners of that section a joint meeting with the United Mine Workers is now being arranged for. which will be held some day next week. At that time the proposition will be thoroughly explained to the men. and it is hoped to have the project endorsed by the various locals.

Advertise that vacant room in the classified column of the Mail.

NEWSPAPER MEN ENJOY EVENING PICNIC

A number of newspaper men, representing newspapers of the valley, from Fredericktown to Monongahela, held an informal picnic at Oakland Park last evening, which was coupled with a short business session. Ten publications were represented, and 16 guests were entertained. Matters of vital interest to the trade, as well as the relation of the newspaper to the community were discussed. It is expected that another meeting will be held within a short time.

ARREST BOLSHEVIK AGENT IN DONORA

A. Messkof, an alien Russian, was arrested by an agent of the Department of Justice on a street car between Donora and Monongahela on Tuesday evening last. Messkof had a satchel filled with Bolshevik literature which it is presumed he was prepared to distribute among the millworkers in Donora. It bore the imprint of a West Madison street, Chicago, publishing house, said to be the stronghold of the red radicals and the I. W. W.

Messkof was placed in the Donora lockup Tuesday night and the next morning taken to Pittsburgh incharge of federal authorities. It is likely that steps will be taken to deport the man, who appeared to be very active in the bolsheviki movement. It is said that considerable literature of this kind has found its way to Donora but the local police have been unable to locate the source of supply. This has caused the federal authorities to get busy, and their first arrest proved to be most important. Other bearers of Red literature will be looked for, and officials hope to break up the line of communication with the western publishing house.

DRUNKEN AUTO DRIVER PAYS FOR DAMAGES

Last Tuesday James Nose, of Fayette City, was arrested for operating an automobile while in an intoxicated condition. He was taken before Justice Bell of North Belle Veron, who fined him $100 and costs. It developed that Nose, while on the highway, ran into a car owned by Michael Kiseda and he was compelled to pay him $80 out of court for damages. Nose was well supplied with wet goods, having several bottles of whiskey in his machine.

A number of Charleroi citizens went to Kennywood park this afternoon to attend the annual Scotish picnic, which is being held at that place today. It is expected that between 10.000 and 15,000 people will be in attendance. Athletic events and Scotish dances will be features of the outing.

Highway Commissioner Pays Hurried Visit to This County

Much to the disappointment of officials and a large number of citizens State Highway Commissioner Sadler, who expected to spend two days in Washington county inspecting the State projects, was delayed by other work, which claimed immediate attention in Fayette and Greene counties, and as a consequence was able to spend but a few hours on Friday in Washington county. However, he promised to return in about two weeks and finish the inspection begun yesterday.

Mr. Sadler spent the morning in Fayette and Greene counties looking over work on the Waynesburg-Jecerson road. He was in Washington in the afternoon, making the trip over the state highway through Amity, arriving abour two o'clock, came on through to the river and returned to the county seat over the Monongahela pike. Immediately afterward he left for Pittsburg to meet some contractors.

Mr. Sadler's inspection of the road in this county was merely cursory and no plans were formulated concerning them. On his trip he was accompanied by W. D. Ulery, chief engineer of the state, and W. D. Meyers, chief engineer of district No. 14, composed of Washington, Fayette and Greene counties, and Chief Engineer Myers of the Allegheny district.

BENTLEYVILLE ROAD IS OPEN TO TRAVEL

That portion of the Bentleyville road leading over Colvin's hill and on to the watering trough, a short distance beyond Oakland Park, which has been under reconstruction for several months, was thrown open to public travel on Thursday. The work of repair was done by the Donora Construction Company, and from all appearances the roadway will last for generations. The new roadway is of concrete composition and of the same character which will be used in other state highways to be built in the future. This new surface measures eight inches in the center, tailing off to six inches at the curb line. The surface is smooth, and the character of the construction makes the ideal roadway. like to complete the road to Bentleyville this fall, but cannot do so unless the Controller is willing to go ahead and advertise the balance of the work for bids.

PACKET SERVICE ON MONONGAHELA

It is said that a regular packet service will be established on the Monongahela river between Pittsburg and Fairmont within the next few days. This announcement was made in Pittsburg on Friday by officers of the Pittsburg and Fairmont Transportation company. The company, it s said has secured the use of two steamers, the Corker and the W. W. It is the purpose of the company to operate three boats in the service, one boat plying between Morgantown and Fairmont, while the Corker and the W. W. will run to Morgantown only.

RAINFALL WAS HEAVY IN MONTH OF JULY

According to the records of the Pittsburgh weather bureau July was an unusually rainy month, 6.20 inches having fallen in that time. The average rainfall for July is 4.23 inches. The month was about normal in temperature, the average being 75.4 degrees. The normal temperature is 74.6.

INJUNCTION IS REFUSED BY COURT

In the Washington county courts on Friday, Judge McIlvaine refused the preliminary injunction asked for by a number of citizens of West Bethlehem township, to prayed to have the school board enjoined from moving the high school from Scenery Hill to West Zollarsville. The board had decided upon this move at its last regular meeting, the vote being three to two in favor of the proposition.

This action on the part of the board did not meet with the favor of those who lived in the Scenery Hill section and a petition was filed in court asking that a preliminary injunction be issued, to be made permanent if upon review the court should so decide. The hearing was held the first part of the week, and Judge McIlvaine handed down an opinion on Friday in which he refused to grant the preliminary injunction, saying that no fraud had been shown by the board in taking this action. which was clearly within their jurisdiction so to do if they wished.

FIRE DEPARTMENT NOW IN NEW HEADQUARTERS

The local fire department is now housed in its new appartments in the borough building. The fire equipment is all installed in the engine room on the first floor, while the upstairs meeting room has not yet been completely furnished. However the members of the department expect to hold their first meeting there on Tuesday evening next.

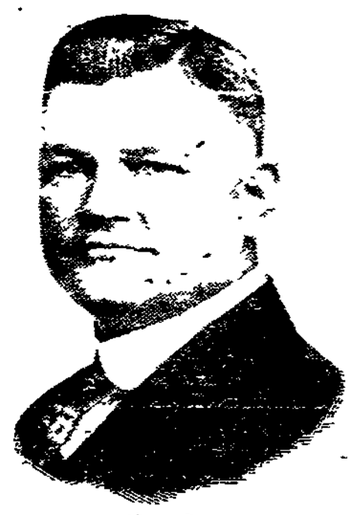
ONE WAY TO COMBAT HIGH COST OF LIVING

To combat the high cost of living 13,000 employes of the Youngstown Sheet and Tube company have organized, through the representation system, to buy necessary staples on a co-operative basis. A representative will visit mail order houses throughout the country. as well as the large distributors. in order to obtain the most desirable prices.

Mr. and Mrs. Louis Rothleder have left for their home in Indiana, Pa., after visiting with their son, George Rothleder, for the past week.

VHSTA COAL COMPANY BUYS ADDITIONAL UP-RIVER ACREAGE

Lieutenant Alex Gray Is Republican Candidate For Sheriff Nomination



Alex. Gray.

Lieutenant Alexander Gray on the solicitation of many of his friends in Washington county has announced his candidacy for the Republican nomination for Sheriff. Gray is a native of Washington county and is best known to the people of the county because of his connection as chief engineer with the State Highway Department in this county for several years which position he resigned sometime before war broke out. Born in Courtney in 1885 he has spent his entire life in the county except when absent securing an education at Pennsylvania State College. Between the ages of 10 and 19 Gray worked in the coal mines along the river, being employed at almost every job about the mines including two years in the engineering department. At the age of 19 Gray entered the California Normal school where he remained for three years and then entered Pennsylvania State College, taking the engineering course and graduating with the class of 1911. Gray became well known throughout the college world as he was for four years a member of the 'varsity football team and captain of the eleven in 1910. After completing his course as mining and civil engineer he served for a year and a half as borough engineer of the borougr of Charleroi, later going to the State Highway Department, where he was employed for for four years, three years of which were in his home community. In the fall of 1917 Gray enlisted in the United States army, being attached to the Air service for 17 months, 10 months of which were spent overseas, being commissioned as first lieutenant. He was honorably discharged from the service several months ago. Lieutenant Gray expects to make an active canvass for the nomination and he has a host of friends throughout the county who will be active on his behalf.—(Adv.) 50t—*

Elsa Staud Denton, the well known Chicago Contralto, is spending the week-end with Mr. and Mrs. C. C. Humphries of Meadow avenue.

Tract Adjoins Workings of Company and Will be Developed at Once

AVERAGE PRICE $350 PER ACRE

One of the largest coal deals that has taken place in the eastern section of the county for some time has just been closed. In this transaction the Vesta Coal Company, a subsidary of the Jones & Laughlin Steel company, and which operates large mines in the Fourth and Fifth pools of the Monongahela river. has purchased the coal belonging to the Joseph Ulery estate. This coal is situated in West Bethlehem township and contains 552 acres. The total consideration was over $193.000. or about $350 per acre.

The heirs who made the sale were Sarah Ulery and Charles Bigler, both of West Bethlehem township, and William E. Ulery, Lily Ellis and the Laura Thompson estate, all of Philadelphia. The largest part of the consideration, it is understood will be paid in cash. Sarah Ulery took a mortgage for $39,000 and Charles Bigler accepted a mortgage for $23,000.

The Vesta Coal company during the past few years has largely increased its facilities for handling the transportation of coal on the Monongahela. All of the mills of the Jones & Laughlin interests, as well as a by-product plant are supplied by the Vesta company. Only recently a new steamer was added to the motive power of the company, while it is their intention to rebuild and thoroughly overhaul and repair other boats of the line. A marine ways was been constructed by the company during the past two years and is now in successful operation at Florence, just above Elizabeth. The acquisition of this additional tract of coal is an indication that the company not only proposes to keep its present working at a normel production, but to increase them if possible.

LARGE ATTENDANCE AT BATHING BEACH

The band concert and entertainment given at the bathing beach last evening was attended by the largest crowd of the season, in fact many believed it to be the largest assemblage ever gathered there. The concert by the Slovak band was fine, while the boxing and club swinging exhibitions were very entertaining features. While the entertainment was on at the beach a base ball game between two colored teams was in progress at the ball park, which made that locality a very lively place for the time being.

A Soldier Shot

Into the store of Footer's Dye Works, 327 Fallowfield avenue and was surprised to find that we cleaned or dyed army uniforms and overcoats so nicely. Bell phone 428J. 50t1—*

CICERONE IN POLITICS.

In the reminiscenses of Col. Henry Watterson now being published serially, there is an account of his quarrell with President Cleveland ,with related correspondence between the two showing that it was not a personal matter and was concerned only with the tariff question. But as both were the tariff reformers, a mere matter of detail taken by itself seems an insufficient cause for a lasting disturbance. There is some indication between the lines that Col. Watterson, who had been longer a student and representive of this reform, exhibited or was thought to have exhibited, a disposition to impose his will upon a man who, above all else, had a will of his own. This may or may not be the real explanation of a surprising rupture and the failure to reach an amicable adjustment.

In no great while Col. Watterson's memories will doubtless reach the date of his quarrel with Woodrow Wilson before the latter was elected President, and this will make more interesting reading still. But in matters of this kind the historian, like the judge, wishes to hear both parties to a quarrel before he finally reaches what he can regard as a just decision. The quarrels of the old war horse of Kentucky with younger Democrats coming into prominence, suggest if they do not actually reveal a tendency to coach and direct ,the consequences of which in some instances can be as readily understood as one might expect them to be foreseen.

THE NATIONAL GUARD

Pennsylvania proposes to reorganize its National Guard the coming fall, and all of the men who served overseas in units composed principally of Pennsylvania men are to be invited to become members The new Guard will be officially designated as the "Twenty-eighth Division," the number it bore during the great war. and is given in compliment by the national government for the splendid service rendered by Pennsylvania men. In addition the red keystone, the insignia bestowed by Gen. Persbing for gallant conduct when he called it a "red fighting division," will be worn by themen as they become members of the National Guard.

The record made by Guardsmen throughout the war was one of which Pennsylvania as well as every other state has reason to be proud. Going into service with a prejudice against them, when the hour of trial came they proved themselves to be the equal and the superior of the Huns to whom they were opposed. They demonstrated that the preliminary training they had received was of the character which went to make good soldiers. and that whatever duty was presented they were ready.The government is honoring the National Guard because the Guard was an honor to the army of which it was a vital and essential part.

ARE WE?

Premier Venezelos wants to know if the United States is participating in the negotiations of a treaty of peace between the Allied powers and Austria The same question has puzzled many Americans. The United States has never been at war with Bulgaria Diplomatic relations were not interrupted during the period in which we were at war with Germany and Austria-Hungary, Bulgaria's allies. The Bulgarian minister remained at his post in Washington. We had diplomatic representatives at Sofia

The hard-time stories told by interned pro-Germans are pointedly discounted by the account of his ten months in a New Jersey jail given by Roger Baldwin, a conscientious objector. He describes his experience as the "most profitable year" he ever spent and sa,ys: "As far as I am concerned, I am better physical condition today than I have been in fifteen years. I have had perfect freedom to read books, there was no censorship of my mail, although of course there were certain restrictions but on the whole I have no personal complaint to make, because I have been treated well."

The London Mail quotes Prof. Gilbert Murray as describing tobacco as "a slight narcotic poison" and as asserting that "the use of bad language is due to the slight nervous convulsion momentarily destroying self-control and releasing subconscious interests which are normally suppressed." However that may be. ,present exhibitions are mild indeed compared with the "nervous convulsions" and "bad language" that will be noticeable when tobacco is exiled.

It appears that the minority vote against the radical prohibition act in the House was both non partisan and non-sectional, being about equally divided between Democrats and Republicans and representing 21 different States scattered from Massachusetts to California and from the Canadian border to Texas. It is spoken of as the protest of the cities more ,than half of the cities of over 100.000 population being represented in the vote.

Talk about "punitive damages" and "the spirit of revenge." The pecuniary loss in the war of France alone is estimated as forty billion dollars and Germany is required to pay only twenty-five billions.

Washington's race riots occurred six months after that city had become "dry" and were fundamentally due to something harder to dispose of than even drink—race prejudice and consequent race friction.

It is somewhat of a shrprise to learn that Senator Poindexter, Presidential aspirant. was born in Tennessee of Virginia parents and did not settle in the far Western State of Washington until he was 23 years old.

Mexico, where fifty Americans have been reported killed within three years. seems determined toinvite the fate of the naughty boy whose actions persistently call for a spanking.

The Coffee Trade.

Statistical returns relating to the coffee trade of the United States show the record breaking figure of 1.319.870.802 pounds as the quantity imported in the 12 months ending June 30. 1917—an amount which maintains the 100,000.000 pounds a year increase that has marked the American imports of coffee since the outbreak of the war in Europe.

Prohibits Religious Symbols.

The Koran prohibits the use of images and symbols in the religious ceremonies of the strict Turks. or the internal decoration of the temples and mosques. the rule being so strict as not to permit the martial or civic decoration of the greatest generals or other distinguished persons.

She Liked Ice Cream.

After looking the menu over carefully Virginia decided on ice cream. Knowing her fondness for sandwiches, her mamma said. "Why, Virginia, I thought you liked sandwiches better than anything else." "I do," she replied, "but ice cream is so tastetative."

Right in Line.

"This high cost of living is something fearful." "What can we do? As the ancient Greeks used to say, matters are on the knees of the gods." "We'll see patches there, too, if this keeps up."

Rubber Outwears Steel.

In a recent test it was found that rubber is in certain respects stronger than steel. A sand blast under enormous pressure was blown on a piece of rubber and a piece of steel, and the rubber outwore the steel three to one.

Worthy Mate of Great Writer.

James Russell Lowell's first wife. Maria White Lowell, was also a poet. A small collection of her verses. printed privately by Lowell in 1855, two years after her death, is now almost forgotten. One copy of it is preserved in the archives of the New York public library. She was the daughter of a farmer in Watertown. Mass. In letters to a friend, when Lowell was first getting acquainted with Maria. he said: "She knows more poetry than anyone I know."

The Candle in History.

The cult of the candle plays a large role in Roman, Jewish and Eastern ecclesiastical history: and many are the customs that have their birth in some magical or ritualistic use to which the candle has been put. In some parts of Ireland, for instance. it was usual on Christmas eve to burn a large candle which no one was permitted to snuff except those who bore the name of Mary.

Beans.

The common bean is a native of South America and was introduced into Europe during the sixteenth century. Now it is represeated by over 150 varieties. The big broad bean is probably a native of southwest Asia and northeastern Europe. The broad. but not thick. lime bean. called by some "butter bean," is a pole variety that comes from South America.

The Village Stocks.

The curious old habit of punishing offenders by placing them in the public stocks seems very far in the shadowy past, yet a number of these old wooden machines may still be seen in England. Usually they stand, or they stood. on the village green, near the church; and it is not such a long while since stocks ceased to be used in the land.

Appropriate Look.

Robert had lost his little pet dog and felt bad about it. His father told him poor little Fido must be dead or he would return home. His mother sent him on an errand. when he met a woman friend of his mother's who asked him if he was ill. as he had little to say "Oh, no," he said. "but my little dog is dead and I am wearing a black look."

Fats in the Body.

Fats in the body occur under the skin in the muscles and around certain organs. They act as a protection for the body against injury and serve as a stored supply of fuel. in case food cannot be taken Fats are liquid in the body and are stored in albuminous cells.

Alexander Hamilton. one of our greatest statesmen. was sometimes called "Alexander the Coppersmith." because of the copper cents he had made in 1793. when he was secretary of the treasury. These pennies were very unpopular with the people. He was killed in a duel by Aaron Burr.

Just a Little One, Maybe.

While to be sure we believe George Washington never told a lie we always will wonder how he got around it if Mrs. Washington ever asked him if he didn't think her new way of serving parsnips made them perfectly delicious.—Macon Telegraph.

Canning in India.

Missionaries to India have started a canning movement among the natives. The products are put up according to the directions put out by the United States department of agriculture.

Thinking of Strenuous Days.

Barber (carried away by his reminiscences)—"And when he'd looped the loop he did a nose dive that fairly took your breath away."—Boston Evening Transcript.

Few Free From Errors.

Why not try to look over the other fellow's mistakes? We have been making them ever since Grandfather Adam lost his place in the Garden of Eden.

No Hasty Judgment.

What your mirror tells you you may depend upon as the result of reflection.—Boston Transcript.

Taxes.

If folks had to pay taxes on grouches this would be a smiller world than it is.

Optimistic Thought.

When intelligence is divided it is very easily destroyed.

Painting Contractors

Sealed proposals for painting the outside wood work of theHigh School, Second Street and Crest Avenue school buildings, Charleroi, Pa., will be received by Dr. T. M Faddis Secretary, until 8 o'clock, Tuesday evening, August 5, 1919.

All wood work to have two coats of lead and oil and all loose putty on windows to be removed and reputtied.

Separate bids must be submitted for each building and contractors must carry compensation insurance.

The Board of Directors reserves the right to reject any or all bids.

The "Cork Convent."

A striking curiosity near Cintra, Portugal, is an ancient convent built partially in the interior of an immense rock, says Wide World. The convent is situated in a very isolated spot, and was formerly surrounded by a dense wood of cork trees. The convent is known as the Convent de Cortica, or "Cork Convent," for the reason that the monks' cells, chapel, kitchen and refectory are all lined with cork to keep out the damp From 1560 to 1834 the convent was inhabited by an order of monks known as the Capuchins, a remarkable feature of their religion being that, except on certain occasions silence was obligatory. Since 1834, when the monasteries and convents of Portugal were dissolved, the convent has not been occupied, though it is open to the public, a caretaker residing there for this purpose.

MILLIONS OF PENNIES ARE BEING COINED

So persistent is the demand for pennies that the mints of the United States during the month of July coined 38,931,000 one cent pieces. The abnormal demand is caused largely by increased prices, principally on purchases, notably soft drinks on which there is a war tax.

SENATE PASSES THE DAYLIGHT SAVIN GBILL

The United States Senate has passed the House bill which provides for the repeal of the daylight saving bill. It is now up to the President and it may be vetoed. President Wilson vetoed the agricultural appropriation bill, on which the daylight saving repealer was a "rider" and it is not unlikely that he will again veto the action of Congress.

LYNN'S GROVE SOLD FOR BUILDING PURPOSES

Lynns grove, containing about 43 acres, and situated a short distance back of Belle Vernon, has been sold to Thomas G. Brown of Belle Vernon, and J. M. G. Brown, of Morgantown. It is the purpose of the new owners to go over the woods thoroughly and cut out all dead timber. Later they will lay the property out in building lots and place them on the market.

According to the Donora Herald that town is in need of 500 houses in order to satisfy the demand now being made by people who wish to live there. Many of the men employed in the mills are compelled to live outside the borough because they cannot find accommodations in the town. A revival of building is promised for the town this fall, but whether it will meet all demands is a question.

California has patched up its troubles with the Greensboro Gas company and the supply will be continued after the first of September as usual. Other up-river towns have also arranged their differences, and everything is apparently lovely at the present time.

The Singing Mouse.

The singing mouse is not a distinct species. According to descriptions of the common house mouse, "Mus musculus," and of the American woodmouse, "Hesperomys leucopus," they have been known to acquire the trick or habit of warbling a few notes in a high key and with a shrill wiry timbre vocalizing in a manner that might be called singing.

The Lee Family.

The Lee family of which Gen. Robert E. Lee, commander of the Confederate army during the Civil war, was a member, was of English origin. One of his ancestors emigrated to Virginia in the reign of Charles I. and the family was prominent then, during and after the Revolutionary war.—Columbus Dispatch.

Mineral Lake.

A lake near Biggar, Saskatchewan, has been found to be saturated with sodium sulphate, and the deposits under the lake and alongside the edge to be nearly 97 per cent pure sulphate. The mineral is used extensively in the manufacture of sulphuric acid, in photography and other industrial purposes.

Cleaning Wallpaper.

To clean and polish wallpaper, add two tablespoonfuls of ammonia to half a pailful of water, and wash the walls down with a flannel dipped in this. Take half a pailful of water and add two tablespoonfuls of turpentine. Wash the walls a second time with this and wipe as dry as possible.

Good Rule for Life.

We are ruined, not by what we really want, but by what we think we do: therefore, never go abroad in search of your wants; for if they be real wants they will come in search of you. He that buys what he does not want, will soon want what he cannot buy.—Colton.

Strongly for Education.

We have always believed in the high possibilities of the movies and more particularly since a charming girl told us she had found you could hold hands just as well at an educational film as any other.—Grand Rapids.

Fortunate Is Our Country.

It is stated that the United States has 5 per cent of the world's population and 33 per cent of its wealth. In other words, one-twentieth of the people and one-third of the money of the whole world.

CHURCH ANNOUNCEMENTS

Free Methodist.

In the Free Methodist mission at the corner of Eighth street and Washington avenue. Sabbath school at 9:45 Preaching 10:45. Evening services at 7:30. You are invited to come with us, and worship the Lord. C. L. Page, Pastor.

First Christian.

Bible school at 9:45. Morning worship 10:45 a. m. Evening service at 8 p. m. Union meeting. Rev. John R. Burson will preach. The public are cordially invited to attend these union services. Rev. C. G. Huffer, Minister.

Washington Ave. Presbfterian.

Sabbath school at 9:45. Preaching at 11. Sermon, "Beauty and God." Sr. C. E. at 7. Union service in the First Christian Church at 8. Rev. John R. Burson, pastor.

First Methodist Episcopal

First Presbyterian.

Sunday school at 9:45. Evening worship at 8. Union service at the Christian church.

Lutheran Church.

Sunday school at 9:45. Services at 11 a. m. only with sermon by Rev. Dr. Dietrich. Congregational meeting.

Notice.

Republican voters of the Borough of North Charleroi. A suggestion meeting will be held in the Borough building Wednesday evening August 6th at 8 p. m.

Jonas M. Gee,
Precinct Committeeman.
50t3p

Donora's Chautaqua will open on Monday next and continue for a period of seven days. The attractions are furnished by the Coit-Alber circuit and are said to be of the highest order. A very promising program has been arranged for the week.

Free Board.

A restaurant in Yuma, Ariz., displays a sign that reads: "Free board every day the sun doesn't shine." At first sight the offer of free board every day the sun doesn't shine might seem a reckless one, but, as a matter of fact, a day without sunshine in that desert country is far rarer than blackberries in May. If it rains at all, it is only for a very short time, leaving most of the day for sunshine, so that the sign would only catch a tenderfoot.

Deeds and Words.

Deeds are greater than words. Deeds have such a life, mute but undeniable, and grow as living trees and fruit trees do; they people the vacuity of time and make it green and worthy. Why should the oak prove logically that it ought to grow, and will grow? Plant it, try it; what gifts of diligent judicious assimilation and secretion it has, of progress and resistance, of force to grow, will then declare themselves.—Carlyle.

Big Canadian Telescope.

The tube of the telescope erected by the Canadian dominion at Victoria, B. C., is large enough to permit of the passage of a small automobile and the reflector is 73 inches in diameter. The movable parts of the telescope weigh more than 40 tons, and the lens alone more than 4,000 pounds, yet one man can easily move the mass into any desired position.

Disapproves Old Adage.

In spite of the old adage to the contrary, some things done by halves are done most satisfactorily, as for example the much-used Quinsigamond bridge at Worcester, Mass. Here traffic suffered a minimum of interruption by completing and putting into use one longitudinal half of the new structure before the other half was built.

Fateful Days.

Certain days have been marked ones in some persons' lives. Nearly all the chief events of Thomas a Becket's career, including his murder and the translation of his body—occurred on a Tuesday. Henry VIII and his three children—Edward, Mary and Elizabeth—expired upon the same day of the week—Thursday.

Spanish Literature.

While literary Spain sank into a deep slumber after the day of Cervantes and Lope de Vega, it awoke brilliantly in the latter half of the nineteenth century, presenting to the world Palacio Valdes, Perez Galdos, Jose de Pereda, Juan Valera, Echegaray and other distinguished writers.

Rusty Steel.

To clean rusty steel, well oil the rusty parts and set aside in this state for two or three days. Then wipe dry with clean rags and polish with emery or pumice stone. When very rusty and a high polish is desired rub the article with a little slack lime.

Co-operation Imperative.

Why not consider the helplessness of a man who thinks he can do everything alone? How much headway can one man make in cutting down a forest and building a city? There must be co-operation with other men.

Beef Suet Not Indispensable.

Norway has discovered that beef suet is not absolutely necessary to the manufacture of margarine. Cod liver oil, herring oil and other fish oils are said to be excellent substitutes.

To Kill Plant Lice.

To kill insects on a cactus plant spray it with a very weak solution of alum—1½ to 2 per cent. This solution is said to be perfectly harmless to the plant but to kill the plant lice.

Little Things.

Life is made up of little things. It is but once in an age that occasion is offered for doing a great deed. True greatness consists in being great in little things.

Daily Thought.

Promise is most given when the least is said.—George Chapman.

MONESSEN BOYS ARE ARRESTED FOR ROBBERY

A number of robberies which have been puzzling the police of Monessen were cleared up Tuesday and Wednesday, when six young men were arrested and placed in the lockup. When taken before Justice White four of the six boys arrested entered a pela of guilty and were ordered taken to Greensburg, to await their commitment to the reform school. Two were exonerated of all blame in the robberies.

ALLEGHENY COUNTY BREAKS A RECORD

Homicide reports for 14 years in Allegheny county were broken last month when only one murder occurred in the county. According to the records of the coroner's office this is the lowest number of murders on record since 1905, when the present system of keeping records was established. Prohibition has caused the decrease, according to the officials of the coroner's office and city and county detectives.

NICE APPOINTMENT FOR BELLE VERNON MAN.

Harry M. White, who has been a resident of Belle Vernon for the past fourteen years, and who has been employed by the Pittsburg Coal company in different capacities, has been advanced to Manager of Mines, this promotion being made a few days ago. He expects to move to Pittsburgh or vicinity.

EDISON'S VOICE IN RECORDS

Inventor of Phonograph, for the First Time, Makes Short Speech Which Will Be Preserved.

Thomas A. Edison, who invented the phonograph 42 years ago, has for the first time consented to have his own voice recorded on a phonograph record. The reproduction, which is on the back of a record containing the national anthems of our allies, was heard recently for the first time in the Edison laboratory at Orange, N. J.

Mr. Edison celebrated his 72nd birthday on February 11. The talk, which is Mr. Edison's first comment about the war since America entered the fight, follows:

"Our boys made good in France. The word 'American' has a new meaning in Europe. Our soldiers have made it mean courage, generosity, self-restraint and modesty. We are proud of the North Americans who risked their lives for the liberty of the world, but we must not forget, and we must not permit demagogues to belittle the part played by our gallant allies. Their casualty lists tell the story.

"However proud we may be of our own achievements, let us remember always that the war could not have been won if the Belgians, British, French and Italians had not fought like bulldogs in the face of overwhelming odds. The great war will live vividly in the minds of Americans for the next 100 years. I hope that when we do reverence to the memory of our brave boys who fell in France we shall not forget their brothers in arms who wore the uniforms of our allies.

"I believe that the national airs of France, Great Britain, Italy and Belgium should for all time to come be as familiar to us as our own 'Star-Spangled Banner.'"

BRIDAL FLOWERS HERE AGAIN

That Orange Blossoms Are in the Market Is a Sure Harbinger of World Peace.

One interesting sign of the coming of peace has been the reappearance of real orange blossoms at weddings. During the war they were difficult to obtain, owing to the fact that they come as a rule from France. Nearly all the orange flowers which are used at smart marriages in London and Paris are grown in the sheltered valleys of the Alps Maritimes behind the Riviera.

Here there are orchards of orange trees scattered over the sunny slopes, and the local peasantry devote most of their time to growing the beautiful flowers. No attempt is made to get the fruit, seeing that the orange trees are solely cultivated for the sake of the glistening blooms.

A large part of the floral crop finds its way to the perfume factories of Grasse, but the choicest sprays are picked for the London and Paris markets. Orange flowers keep fresh for a considerable time, and they stand the journey to England very well, arriving in perfect condition.—London News.

Kangaroo Scored Knockout.

"Ned Kelly, the old buck kangaroo, has been having a fight with the boss stag of the axis deer herd," said Sergeant McGee of the San Francisco park police, "and it is the first time I ever heard of two herbivorous animals so widely different in species finding common ground for a quarrel.

"As a matter of fact, it was the axis deer that started the trouble. He was trying to show off before the does and started butting at poor old Ned Kelly who was peacefully lolloping about with no thought for trouble. The first butt of the deer set Ned thinking, the second set him mad, the third—well, Ned Kelly just turned about and gave the axis deer one wallop under the stomach with its tail. You could hear the smack five blocks away, and it simply knocked the deer flat. It dropped as if it had been shot, while Ned Kelly just hopped away as happy as a bird."

One Thing More.

A pretty girl fluttered over to a neighbor's house Sunday last to borrow some writing paper. She had an important letter to write and mail, and she was out of stationery. About half an hour later she returned for an envelope, and a little later still came back for a stamp. "Well, I hope that's all she wants to borrow today," said the disgruntled neighbor woman as she slammed the door after the pretty girl. "She needs a little 'spit' to make the stamp adhere," said the neighbor woman's husband "and she'll be over after that in a minute."—Arkansas Thomas Cat (Hot Springs, Ark.).

Dr. P. J. Menard outlines in the Presse Medicale a plan for universal compulsory insurance against tuberculosis, the funds from which would serve for the fight against tuberculosis. His scheme is something like compulsory social insurance against sickness, but the tax or insurance dues imposed would include all classes of society, not merely the wage earners. He protests that the fight against tuberculosis should not be left to charity or private initiative.

Unduly Apprehensive.

"I hope they'll make some exceptions in taxing luxuries," remarked the plain person.

"Are you expecting to be hit?"

"I might be. One of the greatest luxuries I know of is sitting around the house in my shirt sleeves and reading the paper."

BELGRADE TO "COME BACK"

Citizens of Serbian Capital Confident Their Beloved City Will Rise From Its Ashes.

Belgrade, the capital of Serbia and Jugo-Slavia, is now a mere shell of its former self. The Serbs used to be remarkably proud of their metropolis. Did they not possess a city with first-class hotels, electric cars, a boulevard, good shops, and all other modern conveniences, not to mention a profusion of the coffee houses and gardens so dear to the heart of the Serb?

These coffee houses of Belgrade are more of an institution than the tavern ever was in London. A cupful of black coffee in a public garden, a military band playing the weird Slavic songs, and the young people dancing the old folk dances on the grass—these represent the height of contentment to the Serb after a day's work.

During the war, however, there was little coffee drunk in Belgrade, and the Serbs have forgotten how to dance. While the streets of a city are systematically shelled by the enemy, and every ablebodied man is off to war, the citizens think less of comfort and concern themselves with safety.

Belgrade was deserted, but its people, those who survived, are coming back to their wrecked homes. They are still battling with hunger, and their loved city is in chaos, but they are hopeful. As the capital of a Slav republic, Belgrade has, they believe, entered upon a new and more auspicious era of its history.

PROTECT THE SONG BIRDS

Sound Advice Which Is as Applicable to United States as to Canadian Farmers.

Our songbirds are now on their way to their Canadian haunts, and some of them may have arrived when these lines are read. Their return suggests the old admonition—protect them in every way possible, because they are the best protectors of our gardens, our garden crops and our orchards. Without these birds the insects would "eat us out of house and home."

In an article on the protection of wild life Jack Miner condenses the whole case into a single paragraph. He takes the robin as the representative of our winged allies in the warfare against insects and worms, and he states his case in this fashion:

"Now what good is the robin? Everybody knows the robin. A boy came along the road with a .22 rifle, saw a robin sitting there, and killed it. I went over and picked the robin up. Two cutworms were squirming on the ground—the robin had had them in his beak. I held the bird up, and two more fell out of his mouth. Remember, one cut worm will cut down five tomato plants in a night. The cut worm does his work and then hides under the soil; Mr Robin comes hopping along, picks in there and pulls him out—and then turns him into a robin. If anyone tells you that a robin will destroy one hundred cutworms in a day, steer from him that it is true."—Montreal Herald.

Ministry of Mirth.

An ex-member of the London county council, the Rev. H. B. Chapman, vicar of that quaint relic of old London, the Savoy chapel, marooned in a backwater of the Strand, has emerged into print, in the columns of the Morning Post, on the great amusement question. Mr. Chapman is convinced that all is not well in the theatrical state of England, and there are many who agree with him. Still he is no mere iconoclast. He has his remedy. It is a very simple one—a ministry of mirth, headed by an ideal chief, and established without delay. But then Mr. Chapman admits that he is an "incorrigible optimist." Perhaps Mr. Chapman might add to the gayety of nations by editing a new edition of the works of Demokritos of Abdera, the Laughing Philosopher, unless, as is quite possible, and not without reason, he regards Demokritos as the first of pessimists.

Home food production will continue because it has been found worth while, is the prediction made in "The War Garden Victorious," a history of the war garden movement in the United States which has just been issued. The book, which gives a complete record of the campaign, declares that "there is no question that the cultivators of our war gardens, now become victory gardens, will continue their labors." The volume is not for sale but is being sent to libraries, garden committees and others interested in keeping a permanent record of this work. The author is Charles Lathrop Pack, president of the National War Garden commission, with whose compliments the book is distributed.

Ventriloquist's Fun.

"Please let me down easy, mister," came a deep voice, apparently from the casket, as Andrew J. Wilson, a negro employed by a Long Beach, Cal., transfer company, was engaged, with another workman, in unloading at a freight station there a coffin containing a body that had been shipped to Long Beach for burial from a town in the middle West.

Wilson was just letting his end of the box down, with about two feet to go. He let it fall the two feet with a bang, and with a flying start he sprinted down the street.

Police Sergeant Clyde Allen of Long Beach, who was standing near the scene with a ventriloquist friend vouches for the story.

General Contractors

Sealed proposals for improvements to be made of the grounds in front of the High School Building, Charleroi, Pa., consisting of concrete walks enlarging coal cellar, etc., will be received by Dr. T. M. Faddis, Secretary, until 8 o'clock, Tuesday evening, August 5, 1919.

Two bids must be made ,one to include the enlarging of the coal cellar and the other without the coal cellar.

Compensation insurance must be carried by contractor.

The Board of Directors reserves the right to reject any or all bids.

Apply to Secretary for plans and specifications.

Dr. T. M. Faddis, Secretary
521 Washington Avenue
Charleroi, Pa.
45-t6

The Ford case report quotes the Court as saying: "I hardly feel competent to stop all speechmaking, and would not unless I had an axe or something." This particular judge is by no means the first wearied mortal who upon occasion has longed for "an axe—or something!"
